This session is chaired by Dr.V.Sridhar Patnaik, Principal, VIET, Guest Speaker Dr.Francis Luther King M, Professor, Mechanical Dept, Swarnandhra Engg College, Dr.B.Srinivasa Rao Vice-Principal & EEE HOD, Mrs.G.Siva Karuna, MECH HOD, Mr.B.Krishna, CSE HOD, Mr.B.Jeevan Rao, ECE HOD, and Mr.M.Uday Baskar, BS&H HOD, Mrs.V.BHARGAVI, Civil HOD, Dr.A.Tulasee naidu, MBA HOD, along with other faculty members of the department and students.

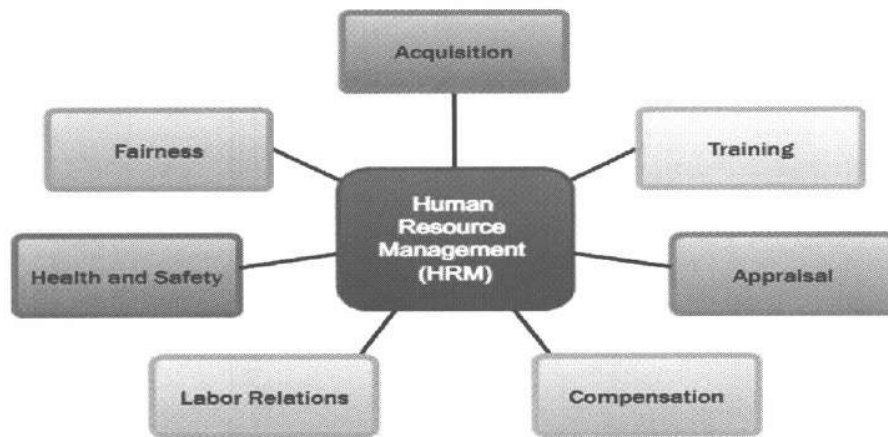

**About the program:**

Topics covered by speaker Dr.Francis Luther King M, Professor, Mechanical Dept, Swarnandhra Engg College is seminar on "Human Resource Management 2K21"

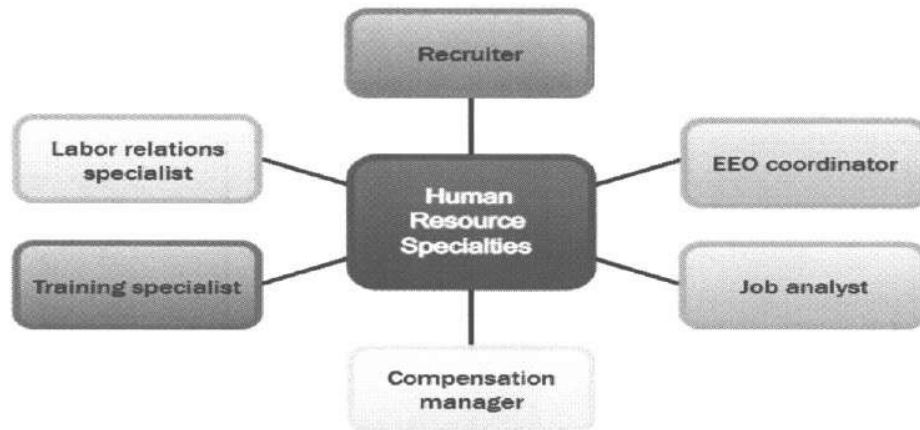

## Human Resource Management Processes

## Human Resource Management

Here the topics covered are Human resource management (HRM or HR) is the strategic approach to the effective and efficient management of people in a company or organization such that they help their business gain a competitive advantage. It is designed to maximize employee performance in service of an employer's strategic objectives. What Are the Three Types of Strategy- and How You Can Apply Them!

- Business strategy.
- Operational strategy.
- Human resources managers **plan, coordinate, and direct the administrative functions of an organization.** They oversee the recruiting, interviewing, and hiring of new staff; consult with top executives on strategic planning; and serve as a link between an organization's management and its employees.

Dr. Francis Luther King M, Professor sir was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the challenges faced by the small scale industries now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

**About the program:**

Topics covered by speaker Mr.V.Suresh, Asst.Prof, MBA Dept, Sai Spurthi Institute of Technology is seminar on "Future R&D Environments"

Here the topics covered are about the Seminar on **"Future R&D Environments"**

The Committee on Future Environments for the National Institute of Standards and Technology, in responding to its task, was again reminded of the enormous breadth and complexity of the science and technology enterprise. The advances in science and technology that actually manifest themselves as changes in our society—as new products or other innovations, as new capabilities, or as new benefits and challenges—depend on a number of factors.

Important among them is what advances are occurring or are likely to occur in science and technology itself—what the committee has called the “push” factors. But there are organizational and dynamic issues as well that strongly affect the research and development enterprise—the patterns of public and private investment, where research is done and by whom, how effective the educational system is, and in what kinds of settings innovation is most likely to occur. These “contextual” factors are particularly important in understanding where and how public policy can most effectively influence the pace and direction of science and technology

Finally, it is necessary to take account of the “pull” factors, those that encourage S&T developments in certain directions and discourage, even proscribe, their development in other directions.

These factors include social and cultural trends and values, growing environmental concern and sensitivity, economic and political pressures arising from both domestic and international circumstances, and issues related to globalization—from competition between developed nations to the growing pressure to deal with the needs of developing countries and the destabilization of the international system that comes about because of severe economic disparities.

Mr.V.Suresh, Asst.Prof sir was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the challenges Future R&D Environments now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

11:30AM-01:00PM	<b>Topic: Workshop on "Protection Enforcement of Intellectual Property Rights"</b>  <b>Venue:</b> Seminar hall <b>Resource person:</b> Dr.T.Venkateswara Rao

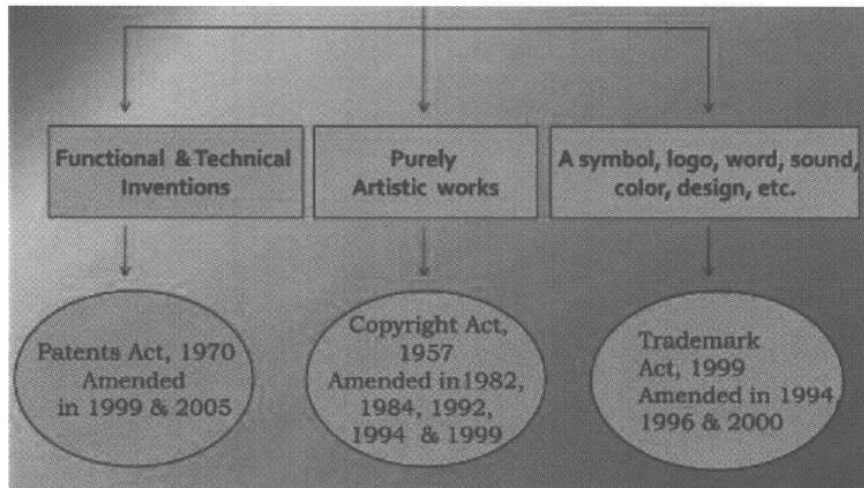

This session is chaired by Dr.V.Sridhar Patnaik, Principal, VIET, Guest Speaker Dr.T.Venkateswara Rao, Professor, Mech Dept, Prakasam Engg College, Dr.B.Srinivasa Rao Vice-Principal & EEE HOD, Mrs.G.Siva Karuna, MECH HOD, Mr.B.Krishna, CSE HOD, Mr.B.Jeevan Rao, ECE HOD, and Mr.M.Uday Baskar, BS&H HOD, Mrs.V.BHARGAVI, Civil HOD, Dr.A.Tulasee naidu, MBA HOD, along with other faculty members of the department and students.

**About the program:**

Topics covered by speaker Dr.T.Venkateswara Rao, Professor, Mech Dept on "Protection Enforcement of Intellectual Property Rights".

- ❑ Law governing IP
- ❑ Meaning
- ❑ Types of IP
  - Patent
  - Trademark
  - Copyright
- ❑ Infringement
- ❑ Case Studies
- ❑ Conclusion

Here the topics covered are the purpose is three-fold: to promote transparency and predictability of laws and policies on the protection and enforcement of IPRs that members have put in place, to monitor the operation of the TRIPS Agreement and to facilitate cooperation between members' competent authorities aimed at eliminating trade in .

Intellectual property protection is critical to fostering innovation. Without protection of ideas, businesses and individuals would not reap the full benefits of their inventions and would focus less on research and development.

What are examples of intellectual property?

Utility patents: for tangible inventions, such as products, machines, devices, and composite materials, as well as new and useful processes. Design patents: the ornamental designs on manufactured products. Plant patents: new varieties of plants.

Intellectual property threats include threats from unauthorized copying over the internet, threats from hackers, and threats from employees.

Dr.T.Venkateswara Rao, Professor sir was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the protection and enforcement of IPRs now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

**About the program:**

Topics covered by speaker Dr.O.U.A.M.Sridevi, Asst.Prof is seminar on "Factors affecting the Small and Medium scale Business"

**DFI Factors Affecting the Performance**

Here the topics covered are the intention of this study is to provide the understanding on how people should start their business by looking at all the factors affecting business success hence help to reduce the risk of failure and increase chances of success. The study examined eight factors that influence the SMEs business success. These factors are: SMEs characteristic, management and know-how, products and services, Customer and Market, the way of doing business and cooperation, resources and finance, Strategy, and external environment. The theoretical framework has been drawn out and questionnaire was designed based on the factors chosen. Eight hypotheses were developed to find out factors that are affecting Business Success of SMEs in Thailand. The entire hypotheses were successfully tested with SPSS and five hypotheses were accepted. The regression analysis result shown that the most significant factors affecting business success of SMEs in Thailand were SMEs characteristics, customer and market, the way of doing business, resources and finance, and external environment.

Dr.O.U.A.M.Sridevi, Asst.Prof madam was an eminent personality we felt very much happy to listen to his speech, mam very well explained about the challenges faced by the small scale industries now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

11:30AM-01:00PM	<b>Topic: Seminar on "Basic Research to Innovation"</b> <b>Venue:</b> Seminar hall <b>Resource person:</b> Dr.M.Sumalatha

This session is chaired by Dr.V.Sridhar Patnaik, Principal, VIET, Guest Speaker Dr.M.Sumalatha, Assoc.Prof, ECe Dept, Sai Spurthi institute of Technology, Dr.B.Srinivasa Rao Vice-Principal & EEE HOD, G.Siva Karuna, MECH HOD, B.Krishna, CSE HOD, B.Jeevan Rao, ECE HOD, and M.Uday Baskar, BS&H HOD, V.BHARGAVI, Civil HOD, Dr.A.Tulasee naidu, MBA HOD, along with other faculty members of the department and students.

**About the program:**

Topics covered by speaker Dr.M.Sumalatha, Assoc.Prof, ECE Dept, is seminar on "Basic Research to Innovation"

### Types of innovation<sup>9</sup>

### Examples for type of innovation

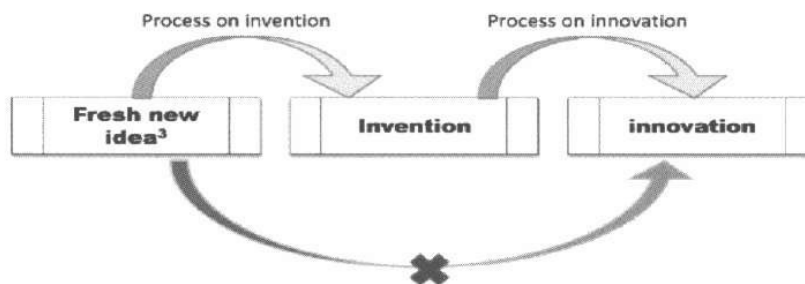

Process	<ul style="list-style-type: none"> <li>Enabling process</li> <li>Core process</li> </ul>	Align your talent & assets <sup>10</sup> Use superior methods to do your work	
Offering	<ul style="list-style-type: none"> <li>Product performance</li> <li>Product system</li> <li>Services</li> </ul>	Employ distinguish features & functionality Create complementary products & services Support and enhance the value of offering	
Delivery	<ul style="list-style-type: none"> <li>Channel<sup>11</sup></li> <li>Brand</li> <li>Customer experience</li> </ul>	Deliver your offering to customer & user Represent your offering & business Foster interaction	
Finance	<ul style="list-style-type: none"> <li>Business model</li> <li>Networking</li> </ul>	Make money connect with other people to make money	

## Difference between invention, innovation and creativity

S.no	creativity	invention	innovation
1	creativity is novel ideas that are communicated, useful, and appealing.	Creating something new <sup>4</sup>	Making the invention into a product form
2	creativity is a fuzzy idea and can't be clarified until it is made into a prototype <sup>2</sup>	A new to the world discovered or created	innovation is about changing a pattern <sup>2</sup> for doing something.
3	Ideas	Cash → ideas <sup>5</sup>	Ideas → cash
4	Based on thinking up new things <sup>7</sup>	Based on primary scientific skills	Based on broad set of strategic, marketing and technical skills. <sup>6</sup>

## Relationship between creativity, invention and innovation.

“Invention is the first occurrence of an idea for a new product or process, while innovation is the first attempt to carry it out into practice.”

Here the topics covered are Basic research in innovation Basic research is the fountainhead of innovation. Basic research is defined as an experimental or theoretical work undertaken primarily to acquire new knowledge of the underlying foundations of phenomena and observable facts, without any particular application or use in view

Research and innovation (R&I) plays an essential role in triggering smart and sustainable growth and job creation. By producing new knowledge, research is central to developing new and innovative products, processes and services, which enable higher productivity, industrial competitiveness, and ultimately prosperity.

Research is an intrinsic aspect of the idea development process. Research helps guide numerous decisions that turn an idea into an innovation.

What comes first research or innovation? The process of innovation is research and the final result of it is innovation. The science of innovation could be referred to as Research; whilst, innovation refers to the effective use of this knowledge.

It's what happens when you are open to new information and willing to take a creative risk. Action research sparks this type of innovation in the following ways: Action research starts with your own observations, experiences, and inquiry and continues through a process of discovery

What are the characteristics of innovation? Rogers' Diffusion of Innovation Theory [5] seeks to explain how new ideas or innovations (such as the HHK) are adopted, and this theory proposes that there are five attributes of an innovation that effect adoption: (1) relative advantage, (2) compatibility, (3) complexity, (4) trialability, and (5), observability

Dr.M.Sumalatha, Assoc.Prof mam was an eminent personality we felt very much happy to listen to his speech, Mam very well explained about the challenges Research and innovation (R&I) plays an essential role in triggering smart and sustainable growth and job creation now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

This session is chaired by Dr.V.Sridhar Patnaik, Principal, VIET, Guest Speaker Mrs.Y.Sudhachandra, Asst.Prof, MBA Dept, PSCMR College of Engg, Dr.B.Srinivasa Rao Vice-Principal & EEE HOD, Mrs.G.Siva Karuna, MECH HOD, Mr.B.Krishna, CSE HOD, Mr.B.Jeevan Rao, ECE HOD, and Mr.M.Uday Baskar, BS&H HOD, Mrs.V.BHARGAVI, Civil HOD, Dr.A.Tulasee naidu, MBA HOD, along with other faculty members of the department and students.

**About the program:**

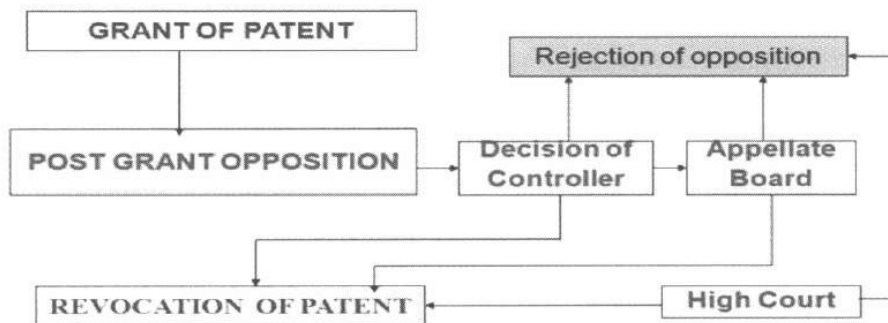

Topics covered by speaker Mrs.Y.Sudhachandra, Asst.Prof, MBA Dept, PSCMR College of Engg, is Seminar on "Indian Scenario of IPR"

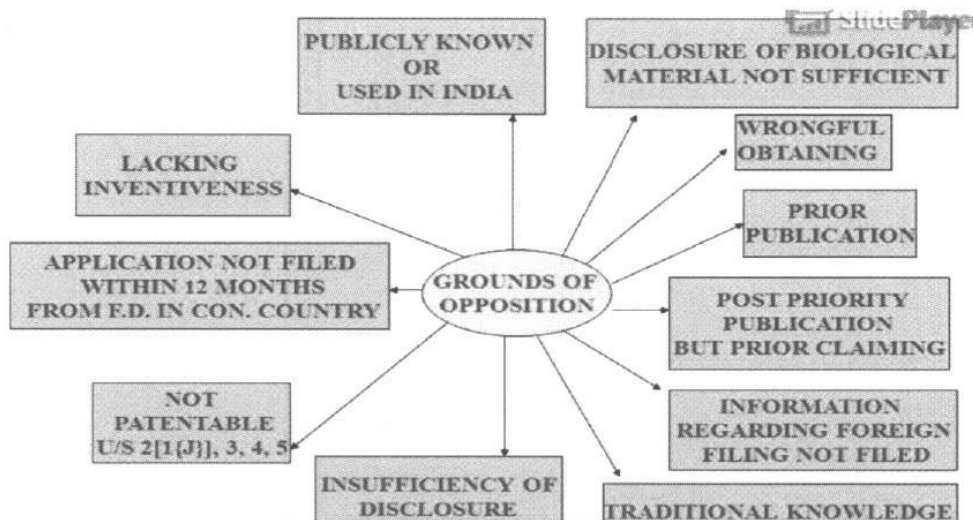

**REGISTRATION OF TRADEMARKS UNDER THE TRADE AND MERCHANDISE MARKS ACT, 1999**

Patents	Designs	Trade-Marks	Geographical Indications
Inventions relating to constructional features	any modification in shape, pattern, configuration	Word Name Logo	Indications of source origin or geography
e.g. Safety Valve, Mechanism of a PRESSURE COOKER	e.g. shape of a handle or body portion of a pressure cooker	e.g. for same Pressure Cooker "PRESTIGE" "HAWKINS" "MAHARAJA"	Darjeeling tea Kanchipuram sarees Kolhapuri chappals

**A PROCEDURE FROM FILING TO GRANT OF PATENT (Cont.)**

Here the topics covered are IPRs are territorial rights that have a fixed term and can be renewed after a specified time period as specified by law by paying official fees. Trade secrets, on the other hand, have an infinite life and do not need to be renewed. Aside from that, trade secrets can be assigned, gifted, sold, or licensed in the same way that any other tangible property can. Unlike other types of moveable and immovable property, these rights can be held in multiple countries at the same time. IPR can only be held by legal entities, i.e., those with the legal right to sell and buy property

On the other hand, the impact of IPR in India is limited and currently faces challenges. Violations are rife because of poor enforcement of rights and court cases that could run on for years. This is a sore point, particularly for large multinational corporations in areas like pharmaceuticals and agriculture. India, for example, is on the United States Trade Representative's (USTR's) 'Priority Watch List' for poor protection of the rights of American companies, along with countries like China, Russia, Indonesia, Saudi Arabia and Venezuela.

The Indian government, for its part, has been reluctant to enforce IPR to protect the interest in Indian citizens in some instances. For example, under the provision of compulsory licensing, the government can force the patent owner or get someone else to mass-produce an essential drug in an emergency. Another contentious issue is of the Indian Patent Act, which prevents large pharma companies from 'ever greening' or continuing the patent in perpetuity by making minor changes in earlier patents.

IPR protection in agriculture is a sensitive topic in India. Under the TRIPs agreement, subsidies like minimum support prices for agricultural produce and those for fertilizer etc. have to be phased out. Since issues of food security and livelihoods are involved here, political parties are unlikely to allow this to happen anytime soon. There has also been some resistance from farmers to the patenting of seeds by multinational corporations.

Mrs.Y.Sudhachandra, Asst.Prof, mam was an eminent personality we felt very much happy to listen to his speech, mam very well explained about the enforce IPR to protect the interest in Indian citizens in some instances now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

11:30AM-01:00PM	<b>Topic:</b> Seminar on "Growth and Development of Small Business in Urban Cities" <b>Venue:</b> Seminar hall <b>Resource person:</b> Dr.P.Sekharbabu

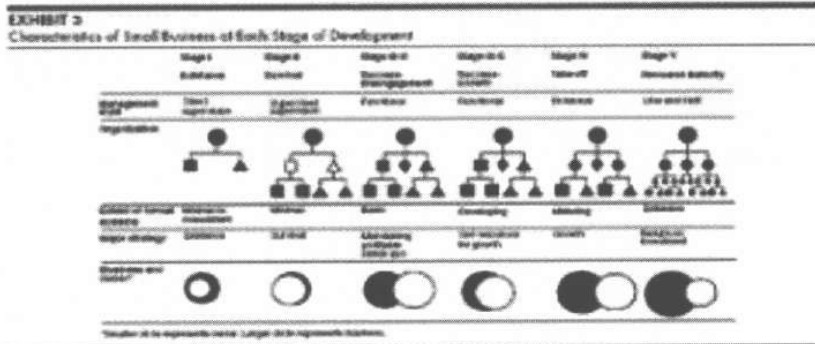

This session is chaired by Dr.V.Sridhar Patnaik, Principal, VIET, Guest Speaker Dr.P.Sekharbabu, Assoc.Prof, Dept of ECE, Sai Spurthi Institute of Technology, Dr.B.Srinivasa Rao Vice-Principal & EEE HOD, Mrs.G.Siva Karuna, MECH HOD, Mr.B.Krishna, CSE HOD, Mr.B.Jeevan Rao, ECE HOD, and Mr.M.Uday Baskar, BS&H HOD, Mrs.V.BHARGAVI, Civil HOD, Dr.A.Tulasee naidu, MBA HOD, along with other faculty members of the department and students.

**About the program:**

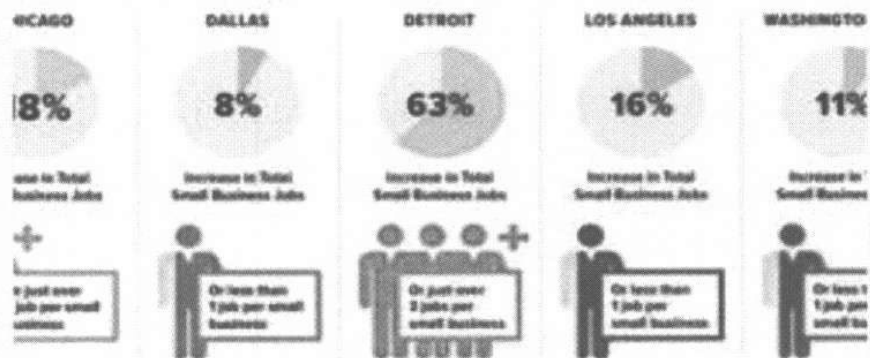

Topics covered by speaker Dr.P.Sekharbabu, Assoc.Prof, Dept of ECE, Sai Spurthi Institute of Technology is seminar on "Growth and Development of Small Business in Urban Cities"

### Number of Small-Business Jobs Required to Eliminate Inner-City Unemployment

### Number of Small-Business Jobs Required to Eliminate Inner-City Unemployment

Here the topics covered are Today, some 56% of the world's population – 4.4 billion inhabitants – live in cities. This trend is expected to continue. By 2050, with the urban population more than doubling its current size, nearly 7 of 10 people in the world will live in cities.

With more than 80% of global GDP generated in cities, urbanization can contribute to sustainable growth if managed well by increasing productivity, allowing innovation and new ideas to emerge.

However, the speed and scale of urbanization brings challenges, including meeting accelerated demand for affordable housing, well-connected transport systems, and other infrastructure, basic services, as well as jobs, particularly for the nearly 1 billion urban poor who live in informal settlements to be near opportunities. Conflicts are on the rise, resulting in 60% of forcibly displaced people living in urban areas.

Once a city is built, its physical form and land use patterns can be locked in for generations, leading to unsustainable sprawl. The expansion of urban land consumption outpaces population growth by as much as 50%, which is expected to add 1.2 million km<sup>2</sup> of new urban built up area to the world in the three decades.

Cities play an increasingly important role in tackling climate change, because their exposure to climate and disaster risk increases as they grow. Almost half a billion urban residents live in coastal areas, increasing their vulnerability to storm surges and sea level rise. In the 136 biggest coastal cities, there are 100 million people – or 20% of their population – and \$4.7 trillion in assets exposed to coastal floods. Around 90% of urban expansion in developing countries is near hazard-prone areas and built through informal and unplanned settlements.

In normal times, there might be many attributes that cities strive to compete on and excel at the global level, including livability, competitiveness, and sustainability, but in any given day and especially in a time of crisis, a city must function well for its citizens.

Building cities that “work” – inclusive, healthy, resilient, and sustainable – requires intensive policy coordination and investment choices. National and local governments have an important role to play to take action now, to shape the future of their development, to create opportunities for all.

Dr.P.Sekharbabu, Assoc.Prof sir was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the challenges faced by the small scale industries now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

**About the program:**

Topics covered by speaker Mr.G.V.S.Srinivas, Asst.Prof, Mech Dept, Aditya College of Engineering and Technology is seminar on use of "**Intellectual Property Rights involving Modern managements Methods**"

- IP was first recognized in the Paris Convention for the Protection of Industrial Property (1883) and the Berne Convention for the Protection of Literary and Artistic Works (1886)
- Both treaties are administered by the World Intellectual Property Organization (WIPO)

Types of intellectual property

Copyright

Patents

Trademarks

Industrial designs

Geographical indications

### ***Strong and Enforced Intellectual Property Rights Protect Consumers and Families***

- Strong IP rights help consumers make an educated choice about the safety, reliability, and effectiveness of their purchases.
- Enforced IP rights ensure products are authentic, and of the high-quality that consumers recognize and expect.
- IP rights foster the confidence and ease of mind that consumers demand and markets rely on.

### **The laws governing the IPR for Indian companies:**

- Agreement of Trade Related Intellectual Property Rights - better known as TRIP's
- to which India is a signatory, is an integral part of WTO and it has an enormous impact on Indian business and trade partnerships
- India has complied its obligations by amending the Indian Patents Act twice
- in the Patents Acts there are areas where substantive or procedural amendments could be considered for complying with the TRIPs

Here the topics covered are International Conference on Intellectual Property Rights

International Conference on Intellectual Property Rights and Law aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Intellectual Property Rights and Law.

This Conference brought together speakers from IGOs, NGOs, academia and the private sector to share their insights on the potential of innovative green technologies in contributing to sustainable development; the role that IP (patents, trademarks, etc.) can play in this field; and the challenges faced, particularly by developing countries, in fostering, accessing and using green innovations.

The International Research Conference Aims and Objectives. The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations. With its high quality, it provides an exceptional value for students, academics and industry researchers.

Mr.G.V.S.Srinivas, Asst.Prof, sir was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the challenges faced Intellectual Property Rights now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

11:30AM-01:00PM	<b>Topic: Seminar on "Introduction to Intellectual Property Rights"</b> <b>Venue: Seminar hall</b> <b>Resource person: Mrs.K.Navya Priya</b>

This session is chaired by Dr.V.Sridhar Patnaik, Principal, VIET, Guest Speaker Mrs.K.Navya Priya, Asst.Prof, MBA Dept, VIET Engg College, Dr.B.Srinivasa Rao Vice-Principal & EEE HOD, G.Siva Karuna, MECH HOD, B.Krishna, CSE HOD, B.Jeevan Rao, ECE HOD, and M.Uday Baskar, BS&H HOD, V.BHARGAVI, Civil HOD, Dr.A.Tulasee naidu, MBA HOD, along with other faculty members of the department and students.

**About the program:**

Topics covered by speaker Mrs.K.Navya Priya, Asst.Prof, MBA Dept, VIET Engg College on "Introduction to Intellectual Property Rights"

### Intellectual Property

- Intellectual Property is a property that arises from the human intellect. It is a product of human creation.
- Intellectual Property is the creation of the human intellectual process and is therefore the product of the human intellect or mind.

### Intellectual Property Management Process

- 1 IP strategy**  
Align assets and their values with greater business goals.
- 2 Decision making**  
Facilitating decisions with academic and scientific teams.
- 3 Policy formations**  
Developing IP policies, licensing contracts, and other agreements.
- 4 Negotiations**  
Administering agreements with partners and contractors.
- 5 Rights protection**  
Identifying, protecting, registering, and monitoring IP rights.

Here the topics covered are Copyright is a form of intellectual property protection granted under Indian law to the creators of original works of authorship such as literary works (including computer programs, tables and compilations including computer databases which may be expressed in words, codes, schemes or in any other form, including a machine readable medium), dramatic, musical and artistic works, cinematographic films and sound recordings. Copyright law protects expressions of ideas rather than the ideas themselves.

Copyright registration does not confer any rights and is merely a prima facie proof of an entry in respect of the work in the Copyright Register maintained by the Registrar of Copyrights. As per Section 17 of the Act, the author or creator of the work is the first owner of copyright. An exception to this rule is that, the employer becomes the owner of copyright in circumstances where the employee creates a work in the course of and scope of employment. Copyright registration is invaluable to a copyright holder who wishes to take a civil or criminal action against the infringer. Registration formalities are simple and the paperwork is least. In case, the work has been created by a person other than employee, it would be necessary to file with the application, a copy of the assignment deed. One of the supreme advantages of copyright protection is that protection is available in several countries across the world, although the work is first published in India by reason of India being a member of Berne Convention.

Protection is given to works first published in India, in respect of all countries that are member states to treaties and conventions to which India is a member. Thus, without formally applying for protection, copyright protection is available to works first published in India, across several countries. Also, the government of India has by virtue of the International Copyright Order.

Mrs.K.Navya Priya, Asst.Prof, Madam was an eminent personality we felt very much happy to listen to his speech, mam very well explained about intellectual property protection granted under Indian law to the creators now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

# Business Equity Funding

## 10 Ways To Raise Money For Your Business

An in-depth Guide  
By ProfitBooks

Here the topics covered are According to a recent study, over 94% of new businesses fail during first year of operation. **Lack of funding** turns to be one of the common reasons. Money is the bloodline of any business. The long painstaking yet exciting journey from the idea to revenue generating business needs a fuel named capital. That's why, at almost every stage of the business, entrepreneurs find themselves asking – *How do I finance my startup?*

Now, when would you require funding depends largely on the nature and type of the business. But once you have realized the need for fund raising, below are some of the different sources of finance available.

Here is a comprehensive guide that lists 10 funding options for startups that will help you raise capital for your business. Some of these funding options are for Indian business, however, similar alternatives are available in different countries.

### **1) Bootstrapping your startup business:**

Self-funding, also known as bootstrapping, is an effective way of startup financing, specially when you are just starting your business. First-time entrepreneurs often have trouble getting funding without first showing some traction and a plan for potential success. You can invest from your own savings or can get your family and friends to contribute. This will be easy to raise due to less formalities/compliances, plus less costs of raising. In most situations, family and friends are flexible with the interest rate.

### **2) Crowd funding As A Funding Option:**

Crowd funding is one of the newer ways of funding a startup that has been gaining lot of popularity lately. It's like taking a loan, pre-order, contribution or investments from more than one person at the same time.

Also keep in mind that crowd funding is a competitive place to earn funding, so unless your business is absolutely rock solid and can gain the attention of the average consumers through just a description and some images online, you may not find crowd funding to work for you in the end.

### **3) Get Angel Investment In Your Startup:**

Angel investors are individuals with surplus cash and a keen interest to invest in upcoming startups. They also work in groups of networks to collectively screen the proposals before investing. They can also offer mentoring or advice alongside capital.

---

Mr.V.Shiva Nagi Reddy, Asst.Prof, sir was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the challenges faced by the Funding Opportunities for Small Scale Business now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

11:30AM-01:00PM	<b>Topic: Workshop on "Protection Enforcement of Intellectual Property Rights"</b>  <b>Venue:</b> Seminar hall <b>Resource person:</b> Mr.Ch.Praveen

This session is chaired by Dr.V.Sridhar Patnaik, Principal, VIET, Guest Speaker Mr.Ch.Praveen, Asst.Prof, Dept of MBA, Swarnandra Engg College, Dr.B.Srinivasa Rao Vice-Principal & EEE HOD, Mrs.G.Siva Karuna, MECH HOD, Mr.B.Krishna, CSE HOD, Mr.B.Jeevan Rao, ECE HOD, and Mr.M.Uday Baskar, BS&H HOD, Mrs.V.BHARGAVI, Civil HOD, Dr.A.Tulasee naidu, MBA HOD, along with other faculty members of the department and students.

**About the program:**

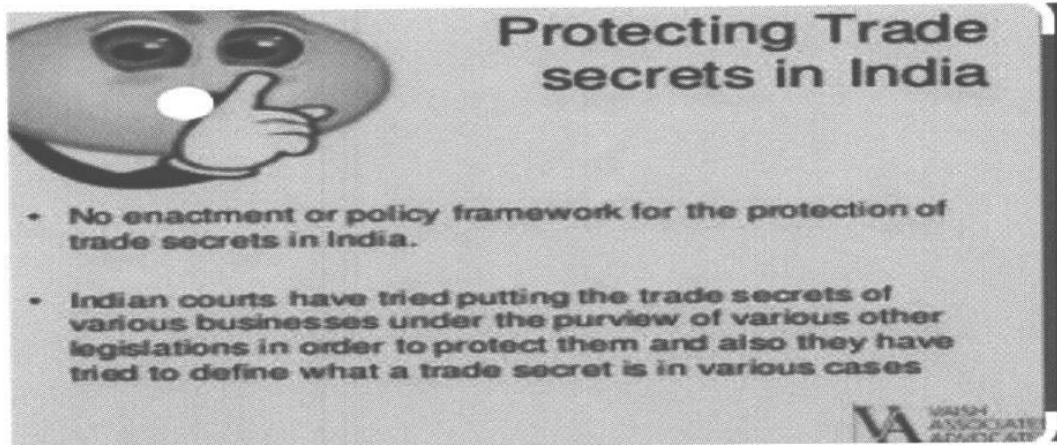

Topics covered by speaker Mr.Ch.Praveen, Asst.Prof, Dept of MBA, Swarnandra Engg College on "Protection Enforcement of Intellectual Property Rights"

**Intellectual Property**

- Laws relating to Industrial Designs (Designs Act, 2000)
- Laws relating to Geographical Indications. The geographical Indications of (Registration and Protection) Act, 1999
- Laws relating to Internet, Web and Information Technology (Information Technology Act, 2000)
- Domain Names

VISH ASSOCIATE ADVOCATE

Here the topics covered are The following IP practice note produced in partnership with provides comprehensive and up to date legal information covering:

- New and emerging technology—protection and enforcement of intellectual property rights
- New technology
- New business models
- Freedom to operate searches
- Future proofing commercial agreements?
- Obtaining appropriate IP protection
- Considering confidential information
- Adopting a ‘Go-to-Market’ strategy
- The challenges arising from the rapid development of new technologies
- When do IP disputes arise? How can they be avoided?

IPR provide certain exclusive rights to the inventors or creators of that property, in order to enable them to reap commercial benefits from their creative efforts or reputation. There are several types of intellectual property protection like patent, copyright, trademark, etc.

What are 4 types of intellectual property protection?

Patents, trademarks, copyrights, and trade secrets are valuable assets of the company and understanding how they work and how they are created is critical to knowing how to protect them.

What are the 7 intellectual property rights?

Rights. Intellectual property rights include patents, copyright, industrial design rights, trademarks, plant variety rights, trade dress, geographical indications, and in some jurisdictions trade secrets.

What is example of intellectual property?

Examples of intellectual property include an author's copyright on a book or article, a distinctive logo design representing a soft drink company and its products, unique design elements of a web site, or a patent on a particular process to, for example, manufacture chewing gum

Mr.Ch.Praveen, Asst.Prof, Dept of MBA, Swarnandra Engg College sir was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the challenges faced by the small scale industries now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

11:30AM-01:00PM	<b>Topic:</b> Challenges facing for Small Scale Industries 2K21 <b>Venue:</b> Seminar hall <b>Resource person:</b> Dr.A.Tulasee Naidu

This session is chaired by Dr.V.Sridhar Patnaik, Principal, VIET, Guest Speaker Dr. Dr.A.Tulasee Naidu, Assoc.Prof, MBA Dept, VIET Engg College, Dr.B.Srinivasa Rao Vice-Principal & EEE HOD, G.Siva karuna, MECH HOD, B.Krishna, CSE HOD, B.Jeevan Rao, ECE HOD, and M.Uday Bhaskar, BS&H HOD, along with other faculty members of the department and students.

**About the program:**

Topics covered by speaker Dr.A.Tulasee Naidu, Assoc.Prof, MBA Dept, VIET Engg College on "Challenges facing for Small Scale Industries 2K-21".

## **SMALL SCALE INDUSTRIES**

**SSI means small scale industries, which is an industrial undertaking with the investment not exceeding Rs.100 lakhs in plant and machinery. In cases of auxiliary industries the investment ceiling on plant and machinery is also Rs.100 lakhs.**

### **DEFINITION OF SMALL SCALE INDUSTRY**

Defining small-scale industry is a difficult task because the definition of small-scale industry varies from country to country and from one time to the another in the same country and by industry.

Small businesses are normally privately owned corporations, partnerships, or sole proprietorships, which constitutes small in terms of government support and tax policy varies depending on the country and industry.

## What are Small Scale Industries ?

### Definition

The industries in India which are organized in a small scale and produce goods with the help of machines, hired labour and power are considered as small scale industries.

### Criteria

Initially, the following units were classified as a small scale business:

- Those using power with less than 50 employees
- Those not using power with more than 50 but less than 100 employees.

## Characteristics of Small Scale Industries

- Adaptability
- Labour Intensive
- Managed by a single individual
- Export contribution
- Localised operations
- Low gestation period**
- Decentralization of economic power
- Production methods

Gestation period can be stated in general terms as period in which firms achieve profitability and a steady income is generated through the business activities. Small scale industries can be set up in a small period of time and they can increase the production at a fast pace. Thus, they have a low gestation period. The capital of the entrepreneur does not remain blocked for a longer period of time.

## Problems faced by cottage and small scale industries

### ➤ Problem of Raw Material:

These industries do not get raw material in adequate quantity. whatever raw material they get is poor in quality and high in price. It increases the cost of production and the goods produced are of inferior quality.

### ➤ Lack of power:

These industries do not get regular power supply. There are frequent power-cuts. Small industries do not have alternative source of energy, so their production process suffers on account of shortage of power.

## INDUSTRY CHALLENGES

Enter your sub headline here

## CONCLUSION

- TO SUM UP WE CAN SAY THAT SSI SERVES AS A SEED BED OF ENTREPRENEURSHIP AS IT PROVIDES CONDUCIVE CONDITIONS FOR THE DEVELOPMENT AND GROWTH OF ENTREPRENEURS . SMALL ENTREPRISES REQUIER LOW INVESTMENT AND SIMPLE TECHNOLOGY AND USE LOCAL RESOURCES TO MEET LOCAL DEMANDS THROUGH PERSONAL CONTACTS.

Speaker Dr.A.Tulasee Naidu, Assoc.Prof, gave a deep and brief seminar on “Challenges facing for Small Scale Industries 2K-21” here in this seminar the topics covered are about small scale industries, types of small scale industries and characteristics of small scale industries, problems faced by cottage and small scale industries also explain about industries challenges some of them are: electronic shortages, cyber security,eco hazard, shortage of raw materials etc..

Dr.A.Tulasee Naidu, sir was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the challenges faced by the small scale industries now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

**About the program:**

Topics covered by speaker Mrs.G.SivaKaruna, Assoc.Prof, Mech Dept, VIET Engg College College, is seminar on "Future R&D Environments"

Here the topics covered are the project that is the subject of this report was approved by the Governing Board of the National Research Council, whose members are drawn from the councils of the National Academy of Sciences, the National Academy of Engineering, and the Institute of Medicine. The members of the committee responsible for the report were chosen for their special competences and with regard for appropriate balance.

National Academies of Sciences, Engineering, and Medicine. 2002. *Future R&D Environments: A Report for the National Institute of Standards and Technology.*

Successful innovation projects are the result of a complex inter-play of many different actors and activities. A critical – but somewhat neglected – success factor for research and development (R&D) and innovation projects lies in creating the favourable spatial conditions in which employees carry out R&D activities.

Research has shown that designing physical environments can encourage processes that play a vital role in product creation, such as knowledge-sharing, learning and collaboration. For example, pioneering work done by Tom Allen from MIT, already published in the 1970ies, demonstrated that communication between individuals is of utmost importance to initiate and to develop new ideas.

However, only few additional authors have given specific attention to R&D work environments (e.g. Boutellier et al., 2008) or have put an effort into integrating different research streams. In contrast to other facilities, R&D buildings are usually highly complex and have to fulfil a wide range of functional, technical, economical and legal requirements. All eventualities that may occur over the life span of a building can be hardly predicted for ordinary buildings – let alone for research buildings (Hegger, 2005). When industry created specialised R&D facilities, back in the beginning of the 20th century, they emulated the university system (Allen and Henn, 2007). In these organisations, departments organised around specialised areas of knowledge. This organisational structure, however, proved to be too simplistic. As products got more complex and embodied more technologies, a variety of disciplines had to be integrated, which required a significant amount of coordination. Specialists had to keep one another informed of what they were doing on a regular basis. Over the course of the last decades, R&D-intensive firms have therefore formed their own ways of organising R&D work.

In the meantime, the authors observe a growing interest from industry to know more about the design of R&D facilities. The motivations for this interest are manifold. Some companies have been able to grow steadily in recent years and simply require bigger R&D buildings. Other organisations have to deal with the growing complexity of their products, forcing them to integrate more external specialists into their R&D projects.

---

Some want to offer the most advanced R&D work environments to attract the most talented scientists and engineers. From an academic perspective, research on the design of R&D work environments is usually limited to case studies of large, multi-national companies. There are almost no efforts to generalise the findings for a wider range of organisations, especially for mid-sized firms that have limited R&D resources.

Mrs.G.SivaKaruna, Assoc.Prof, Mech Dept, VIET Engg College mam was an eminent personality we felt very much happy to listen to his speech, mam very well explained about the challenges faced Future R&D Environments now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

**About the program:**

Topics covered by speaker Mr. Abdul Arif, Asst. Prof, Aditya College of Engg and Technology is Seminar on "Basic Research to Innovation"

Created with Jotter on my iPad  
TabulaFuturaLabs.com

Here the topics covered are Four related assets support the nation's innovation system, said Norman Augustine, former chairman and CEO of Lockheed Martin Corporation, in the final discussion of the symposium: knowledge capital, human capital, financial capital, and the broader innovation ecosystem.

Beginning with knowledge capital, the United States devotes only about 0.2 percent of its GDP to federal support for basic research, Augustine pointed out. Yet, economists have shown that much of that GDP is the result of advances in science and technology. "The nation needs to address the balance between investment and consumption," he said.

Regarding human capital, the United States has the finest research universities in the world—all 5 of the top 5 and 18 of the top 25, according to The Times of London. Yet, states have been disinvesting in public higher education and converting many of their flagship universities to, as Augustine put it, "quasi-private universities, but without the endowments that many private universities enjoy," even as the federal government has begun taxing the gains on the endowments of some private universities. Meanwhile, according to the World Economic Forum, U.S. K-12 schools ranked 48th in the world on measures of mathematics and science, and the United States ranked 76th in the world for baccalaureate-level degrees awarded in engineering, Augustine said.

Turning to financial capital, total public and private spending for R&D as a percentage of GDP has remained relatively constant for about half a century, even as the role of science and technology in the economy has exploded. At the same time, American industry has shrunk or shuttered most of its finest research laboratories and China has surpassed

Mr.Abdul Arif, Asst.Prof, was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the challenges faced by the Basic Research to Innovation now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

11:30AM-01:00PM	<b>Topic: Topic: Seminar on "Procedure for Filing a Patent</b> <b>Venue: Seminar hall</b> <b>Resource person: Dr.T.Satyanarayana</b>

This session is chaired by Dr.V.Sridhar Patnaik, Principal, VIET, Guest Speaker Dr.T.Satyanarayana, Assoc.Prof, Mech Dept, VIET Engg College, Dr.B.Srinivasa Rao Vice-Principal & EEE HOD, Mrs.G.Siva Karuna, MECH HOD, Mr.B.Krishna, CSE HOD, Mr.B.Jeevan Rao, ECE HOD, and Mr.M.Uday Baskar, BS&H HOD, Mrs.V.BHARGAVI, Civil HOD, Dr.A.Tulasee naidu, MBA HOD, along with other faculty members of the department and students.

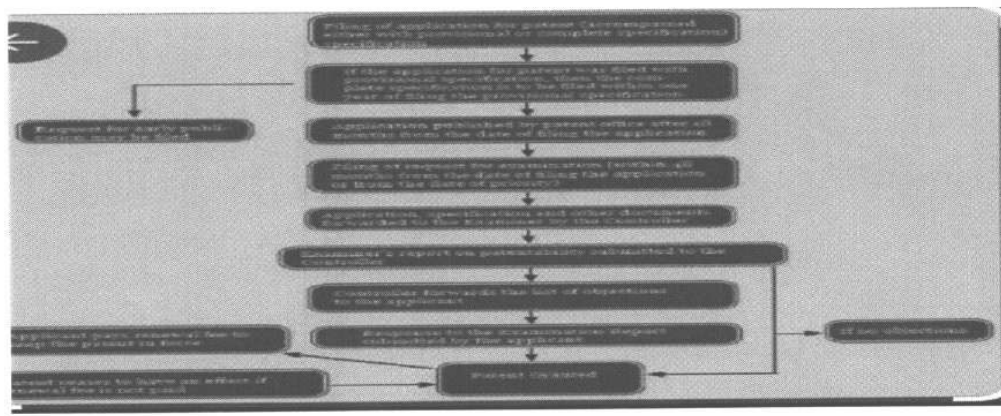

**About the program:**

Topics covered by speaker Dr.T.Satyanarayana, Assoc.Prof, Mech Dept, VIET Engg College is Seminar on "Procedure for Filing a Patent"

### Procedures for Filing Applications

- A non-provisional patent application may be filed **without claims or drawings or by reference to a previously filed application**
  - Exception: Does **not** apply to design applications
- The non-provisional application will **NOT** be placed on an Examiner's docket until the application includes:
  - A specification
  - At least one claim

Here the topics covered are the process for getting a patent has four steps.

Step 1: File an application for a patent with the United States Patent and Trademark Office (USPTO)

Step 2: Examination of patent application.

Step 3: Respond to any objections or rejections made by the examiner.

Step 4: Patent grant.

A patent is a legal document that is granted by the government of the state or the country, depending on the national rules. It gives an inventor of a particular thing, the exclusive right to make, use and sell his or her creation for a specified period of time.

What is the purpose of patent?

A patent is an exclusive right granted for an invention, which is a product or a process that provides, in general, a new way of doing something, or offers a new technical solution to a problem. To get a patent, technical information about the invention must be disclosed to the public in a patent application.

Dr.T.Satyanarayana, Assoc.Prof, Mech Dept, VIET Engg College sir was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the challenges faced by Procedure for Filing a Patent now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

**About the program:**

Topics covered by speaker Mrs.K.Swathi, Asst.Prof, ECE Dept, Sai Spurthi Institute and Technology Seminar on "Social, Economics & Policy Research"

Here the topics covered are Strategic management is the ongoing planning, monitoring, analysis and assessment of all necessities an organization needs to meet its goals and objectives. Changes in business environments will require organizations to constantly assess their strategies for success.

**So here are 10 steps for small businesses to build a successful strategic planning process:**

- Include the right people. ...
- Gather the data. ...
- Expect preparation. ...
- Create the right environment. ...
- Build your plan. ...
- Focus on growth and value. ...
- Organize around strategic objectives and an actionable plan. ...
- Gamify.

**What Are the Three Types of Strategy- And How You Can Apply Them!**

- Business strategy.
- Operational strategy.
- Transformational strategy.

Mrs.K.Swathi, Asst.Prof, mam was an eminent personality we felt very much happy to listen to his speech, mam very well explained about the challenges faced by the Social, Economics & Policy Research now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

**About the program:**

Topics covered by speaker Dr.K.Dayana, Assoc.Prof, Civil Dept, VIET Engg College is seminar on "Entrepreneurship Benefits for Under graduation"

Here the topics covered are Identifying and developing leadership that is aligned for challenges of the digital era is critical for most organizations today. With continuous change in the profile and priorities of the human capital over the years, the nature and style of leadership has no option but to adapt to ensure there is equal focus on revenue as well as employee satisfaction. The intense open market competition and technological revolutions, apart from putting a tremendous work pressure on the leaders and managers, has also created a requirement of conceptualizing and designing a new set of modern practices in practically every aspect of work place. In today's context of people's demographics, automated processes, a connected world and changed aspirations, the previous management literature, practices, tools and techniques need a complete revamp. There is a clear felt need of redefining the concept, and its practice to deal with the new set of challenges due to digitization and massive disruption arising out of it.

This course from IIM Lucknow is conceptualized to address this critical need of leaders and managers who are ready to take on the challenge of not only to make the organizations survive but to make it grow manifold. This course will offer insights into theories and application of leadership with an emphasis on learning knowledge, skills and values. The course intends to be participative with a lot of reflections/assessments into one's own style of leadership. Thus, providing opportunities to identify specific areas of improvement.

Dr.K.Dayana, Assoc.Prof, mam was an eminent personality we felt very much happy to listen to his speech, mam very well explained about the challenges faced by Entrepreneurship Benefits for Under graduation now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

**About the program:**

Topics covered by speaker Dr.K.RajuBabu, Asst.Prof, MBA Dept, VIET Engg College is seminar on "How to write a Paper"

### How to Write an Analysis Essay

<b>Essay Template</b>	<b>Body Paragraph 2:</b>
<b>Introduction Paragraph:</b>	• Weakest point
• Hook	• Intro...Transition
• Thesis	
• Transition	
<b>Body Paragraph 1:</b>	<b>Body Paragraph 3:</b>
• Strongest point	• Second-strongest point
• Introduction	• Intro...Transition
• Examples	
• Explanation	
• Conclusion that ties to thesis	
• Transition	
	<b>Conclusion Paragraph:</b>
	• Restated thesis
	• Concise summary of the body and how it ties to thesis
	• Signal for the end of essay

Here the topics covered are Organizing the Project Paper The project paper must have an introduction, a main body and a conclusion. Before you start the writing process, you should make a detailed outline.

#### Introduction

The introduction must describe what the paper will be about and clearly state the approach to the topic as a question or statement. (thesis question (Am.)) The question/statement must be linked to at least one competence aim in the English curriculum and be addressable in about 1800 to 2000 words. The introduction must also present how you chose to solve the task i.e. what method(s) you have used to investigate the question/statement. What you write in the introduction will be decisive for what you write in the rest of the project paper.

#### Main Body

When you have stated your question/statement and explained how you will solve the task, you can start writing the main body of the project paper. The main body of the paper is your attempt to answer your question/statement. You should present and build up a structured argument about the research.

By analyzing and interpreting the sources you have chosen to include in the paper, and supporting your arguments by referring to your sources, you are to reach your own personal conclusion with regards to the question/statement in the introduction. During the writing process, it is important to reread the introduction to be certain that you have accomplished what you set out to do. If you have not, you may choose to edit the introduction so that it matches the main body of the paper.

It is important to use correct terminology when you are writing. It increases the level of accuracy, and thus the standard of the paper. Where it is relevant, you may include illustrations and tables.

#### Conclusion

The conclusion should summarize the findings from the main body of the paper, and answer the question/statement. The conclusion should not come as a surprise to the reader, but be consistent with the arguments you have used. In some cases, the conclusion will raise new questions, which you can include to show that you have good insight into the topic you have chosen to write about.

#### Formal Presentation

We suggest that the length of the project paper should be between 1800 and 2000 words. The word count must be included in the paper and placed after the conclusion. The word count should not include the cover sheet, table of contents, illustrations or list of sources. The project paper should be written using formal language. It should be in A4-format, include a coversheet, a table of contents, and a list of sources, in addition to the actual project paper.

---

The coversheet is to include the title of the paper, your name, the subject, the name of the school, and the year. The title does not have to be identical to the question/statement about your approach to the topic. The table of contents should be placed immediately after the cover sheet, and include page numbers.

The list of sources should start on a new page at the end of the document. Note that the list of sources is not to be grouped according to the type of source, but should be organized alphabetically by the author's last name. Still, depending on type of source, the sources will differ in format. A novel for instance will be listed in a different format than an article.

Dr.K.RajuBabu, Asst.Prof sir was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the challenges faced How to write a Paper now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

**About the program:**

Topics covered by speaker Dr.DNV Krishna Reddy, Professor, MBA Dept, Sai Spurthi Institute and Technology Seminar on "Culture of Entrepreneurship"

# Types of Culture

Here the topics covered are Entrepreneurial culture can be described as an environment where someone is motivated to innovate, create and take risks. In a business, an entrepreneurial culture means that employees are encouraged to brainstorm new ideas or products. When work time is dedicated to these activities, it is called entrepreneurship.

We were honored to present to North Carolina Community Action Agencies last week. They asked us to present on the cultural element most missing in the social space – entrepreneurial culture. In our research, we have learned that many nonprofit cultures are hierarchical or family-based, both of which can have advantages. However, as we move solidly into the 21st century and come out of the pandemic, we need more dynamic cultures. Many nonprofit executives agree. According to the Duke Nonprofit Program, many nonprofit leaders want a more entrepreneurial culture that supports stronger, more responsive organizations.

You often hear people say that nonprofits should be more like businesses. When they say this, we believe what they really mean is that nonprofits should be more entrepreneurial. But, what is entrepreneurial culture and how does this translate to the social sector? Peter Drucker described it well when he said, “An entrepreneur always searches for change, responds to it and exploits it as an opportunity.” With the shifts in the social sector, the most successful high-impact, high-performance organizations see change coming and adapt to it.

One of the key drivers of these organizations is culture, which, when properly cultivated, can be the difference between a good and great organization.

Our favorite definition of culture comes from Debra Thorsen – “An energy force that becomes woven through the thinking, behavior and identity of those within the group.” Taken together, entrepreneurial culture can be a powerful energy to unleash into your organization and a tool to motivate employees, especially millennials toward making a difference.

Dr.DNV Krishna Reddy, Professor sir was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the challenges faced by Culture of Entrepreneurship now a days, staff and students also showed interested to listen the seminar because it covered use full applications.

**About the program:**

Topics covered by speaker Mr.P.Nagasekhar, Asst.Prof, ECE Dept, Sai Spurthi Institute and Technology, is seminar on "Dynamics of Entrepreneurial Process"

Here the topics covered are Entrepreneurship is vital for improving economic growth, productivity, innovation and job creation. It serves as a career opportunity generating opportunities for the upward mobility,-including the immigrants. However, in the EU, entrepreneurship supporting policies have been less successful as compared to other advanced economies. MED (Micro-foundations of entrepreneurial dynamics) was an EU-funded project focused on the -factors affecting the entrepreneurial experience. This includes ambitions, business strategies and environmental factors, including policies, institutions and social context.

The work was based on the Panel Study of Entrepreneurial Dynamics (PSED) protocol developed in the United States in the 1990s, and focused on comparable panel studies in the United Kingdom and other European countries. It involved addressing complications associated with the development of these longitudinal studies, which are expensive, and require commitment from a research team. Such challenges are indicative of the complexity.

Since participation in business creation is low, only roughly 1 in 20 adults was part of the representative sample. Additionally, business creation is a multifaceted and complex endeavour that lends to a lengthy interview process. Also, the financial status of start-ups can take a number of years to be known. A detailed interview questionnaire and methodology suitable for implementation across the EU as a study on nascent entrepreneurs was developed. It involved a total of five national teams with an interest in implementing synchronised projects in Finland, Latvia, Spain, Switzerland and the United Kingdom.

Mr.P.Nagasekhar, Asst.Prof sir was an eminent personality we felt very much happy to listen to his speech, sir very well explained about the challenges faced by the Dynamics of Entrepreneurial Process now a days, staff and students also showed interested to listen the seminar because it covered use full applications.
